

Brian E. Dietrich *Phone: 250-758-4974; visionary1@shaw.ca*
C.E.O. Envisions 2001
Retired Environmental Coordinator/Specialist
B.C. Hydro

Biography: Brian recently retired as an Environmental Coordinator for the Material Management Business Unit of BC Hydro and was responsible for their Comprehensive Resource Recovery Program, Education and Special Waste Issues throughout the province. Brian accomplished much during his career. In 2006 Corporate BC Hydro's Triple Bottom Line Report, BC hydro achieved an 85% diversion of waste materials being sent to landfill.

"Much of what was once considered waste is now becoming a resource, particularly in the field of e-waste," says Brian. "Zero waste has become my personal goal. Whether it is achievable or not, that is my goal. Besides, who wants to manage waste... Creating resources through vision and creativity by avoiding waste in the beginning of the life cycle is achievable."
We need only share resources and knowledge, and to communicate to achieve what we individually cannot... "together we can make a difference".

Brian specializes in many fields, a few being:

- Ø Energy/Water Conservation
- Ø Auditing Environmental Performances
- Ø Preparation of Best Management Practices
- Ø Expert on Sustainability and Green Procurement Initiatives
- Ø WHMIS, Transportation of Dangerous Goods and Spill Response Training and Planning.

Brian continues to want to help others make a difference for themselves, their neighbours, children, future generations and our world; leaving it a better place to live. Give him a call to discuss opportunities.

Brian Dietrich, Associate/Consultant comes to us from BC Hydro as a former Environmental Coordinator Technical Specialist after 33 years with the Utility.

Throughout his career and lifetime experiences, Brian has become and expert in:

- Energy and Water Conservation
